

SEVERE WEATHER RADIO INFORMATION

Programming

Help with weather radio programming is available at the Fire Department.

Bring your weather alert radio and instructions and we will assist you in configuring it.

Please call the station at 966-2164 before you come by to insure we are not out on an emergency.

Severe Weather Alert Radio

The Fire Department recommends the following

Midland WR300 Weather Radio:

<https://midlandusa.com/product/wr-300/>

Check www.Amazon.com for pricing.

It has 120v plug in wall power plus AA battery backup so you can bring the radio with you to your shelter area if you desire.

The SAME settings allow you to select only the warnings you want for a specific county or counties. Examples would be selecting only tornado warnings for Jackson County or only tornado and severe thunderstorm warnings for Brown County. This helps minimize the nuisance alarms the old weather radios were known for.

The Nation does not provide weather alert radios through any of its current programs.
