

COVID-19 SYMPTOMS

COVID-19 symptoms usually take **2-14 days to develop** after being infected with the virus

SYMPTOMS

Common symptoms include:

Fever

Cough

Shortness of breath

Tiredness

People with **existing medical conditions** like diabetes, asthma, high blood pressure and heart problems are more likely to get seriously ill from the disease.

Around 1 out of every 6 people who get COVID-19 becomes seriously ill and develops difficulty breathing.

WHEN TO SEEK MEDICAL HELP

Seek medical help immediately if you're experiencing any of the following symptoms:

Trouble breathing

Persistent pain or pressure in the chest

New confusion or inability to arouse

Bluish lips or face

Any concerning symptoms apart from the above should also be **reported to a health care expert immediately** when observed.
