SCOPE OF WORK

1. NARRATIVE

The Prairie Band Potawatomi Nation (PBPN) Construction Management Department is issuing this Request for Proposal (RFP); to initiate the selection of a qualified Contractor to enter into an agreement with the Owner to perform construction services for a wood post or steel beam metal building to be utilized as a new equipment building for the PBPN Lands department to be located at 15185 K Road, Mayetta, KS.

The Contractor will construct at minimum a 72’ x 120’ x 18’6” Wood truss or steel beam metal building. All posts or beams are to be fastened to the concrete footing / stem wall that will need to be engineered / designed for the project. Chosen vendor will be responsible for all work for the building as proposed (concrete, barn installation, doors, Electrical).

Project can start once contracts are signed. Completion is preferred as early as possible, with an absolute completion date of 12/31/2023.

2. OWNER’S OBJECTIVE

The objective of this Solicitation is to select a Qualified Contractor to assist PBPN in determining the best location for the new building and to perform all necessary installations and construction of the new building, concrete footings, slabs, gravel floors, driveways, and electric service per the specifications in this scope of work for the Lands Department Equipment Building.

The project requires approval from a variety of numerous groups at PBPN before final approval is given to award. In order to get final approval, the Proposers shall provide preliminary drawings, proposed detail budget, and vital information to support the approval of this project from the various groups.

Original building was damaged by a tornado in 2022. The building has been removed, and the electric service has been temporarily re-built in place to keep other buildings operating that were connected to the service. The original location of the building was not in a great location or positioned properly and continually had wind damage issues. At this time PBPN is open to relocating the building on the property to alleviate these issues in the future. Please review the map (Attachment “L”) as to various locations PBPN has proposed for the building. The vendors proposing this project will need to plan on which location is best suited for this building, potentially have less wind damage, and for a location to not require a lot of site work and gravel driveway work to increase cost. PBPN is looking for the best location in preparing for the wind, as well as financially.
