Per Kansas Law KSA 8-1343 Child Passenger Safety Act all children that fall under this act will be required to be in an appropriate federally approved child safety seat.

Seatbelts are a law in every state. Our drivers will not move the transportation vehicle unless all passengers are restrained properly in the seatbelts according to Kansas Law KSA8-2501.

The definition is “wireless communications device” to include any type of device that sends or receives messages but to exclude voice-operated devices. Absolutely no passengers can use the driver’s cell phones at any time.

Assistance by Driver

Patrons that have someone ride with them to assist them can have 1 Personal Care Attendant ride for free. These helpers are known as PCA’s or Personal Care Attendants. Please inform dispatch if you will have a PCA at the time of scheduling your ride. If you do need assistance and do not have a PCA our drivers are not allowed to assist as we are origin to destination service. If you feel that you are in need of any type of medical attention, we ask that you inform the driver right away so the driver can take proper steps to get the proper emergency attention in a timely manner.

Three or More Wheeled Devices Assistance & Restraints

A.) driver Assistance & responsibilities- please dispatch at time scheduling that you do need three or more wheeled device transport. Per Grant regulations our drivers are trained to use all chair restraints properly for three or more wheeled devices. By regulation our drivers are required to use the restraints for transport regardless of patron’s denial- Drivers of this program are required to use them. If a restraint cannot be properly secured the PBP public transit will still transport.

B.) Personal Care Attendants: are not allowed to place the restraints on the three or more wheeled devices of the person they are assisting. They can watch the driver place the restraints on the three or more wheeled devices and report any faults as necessary to our Program manager. But the PCA cannot place or remove the restraints as this would pose a liability as per regulation.

Securement of Other Medical Equipment

(oxygen tanks, walkers, etc.) Any and all medical equipment that cannot be carried in hand, held with passenger, or not attached to a three or more wheeled device, will need to be properly secured in the most secure spot a driver has available in the transporting vehicle.
