SCOPE OF WORK

1. NARRATIVE

The Prairie Band Potawatomi Nation understands our shared responsibility in eliminating fatal and serious crashes for all roadway users, including those who walk, bike, drive, ride transit, and travel by other modes in our community. We are committed to a holistic approach in how we think about transportation safety and how we prioritize investments across the entire transportation system so that we can build a safe and better system for all users and all modes.

By developing a comprehensive safety action plan for the Prairie Band Potawatomi Nation, our area will commit to providing a framework of innovative strategies and implementation actions that will ensure crash reductions and support federal safety initiatives. Through expanded collaboration with stakeholders and community members, PBPN will develop a joint comprehensive safety action plan that is founded upon the following:

- Stakeholder and public engagement plan, with a strong emphasis on equity and outreach to the PBPN community.
- Data collection and review, including a summary of existing programs, policies, and studies as well as a peer review of comparable areas.
- Safety analysis, including an analysis of trends, contributing factors, and patterns of transportation-related accidents in the region.
- Transportation equity review, including an assessment of regional equity indicators related to accessibility, connectivity, environment, health, engagement, and effectiveness, and how transportation systems affect and /or influence safe and equitable outcomes.
- Dashboard and toolkit, including graphic visualizations that illustrate safety countermeasures, context-sensitive solutions, user educational components, and performance measure tracking.
- Policies, programs, innovative practices, and low-cost/high-impact strategies; and
- Specific construction projects with scope, budget, and time frame

Performance Tasks

Prairie Band Potawatomi Nation is seeking a consultant that can not only provide the typical qualifications necessary in the development of the Comprehensive Safety Action Plan but also can provide proactiveness, vision, innovation, and collaboration in examining and proposing strategies and recommendations that will ensure a reduction of fatal and serious crashes for all roadway users.

Outlined below is the scope of work that will guide the development of the Comprehensive Safety Action Plan. PBPN has included the following scope of work to provide interested consultants insight into project intent, context, coordination, responsibilities, and other elements to help facilitate proposal development.

This outline is not necessarily all-inclusive, and the consultant may include in the proposal any additional performance tasks that will integrate innovative approaches to successfully complete the Comprehensive Safety Action Plan. At a minimum, the consultant shall be expected to establish detailed outlines, analyses, assessments, and recommendations for the following tasks:

Project Structure and Work Plan

Building on the scope of work presented in their proposal, and incorporating any relevant changes made during contract negotiations, the consultant will prepare a detailed work plan and the achievable timeline for the Comprehensive Safety Action Plan anticipated to be completed by November 2024. The work plan will outline the overall approach as well as specific actions and activities that will occur during the project and how these will result in a successful conclusion to the study.

Project Management and Coordination

The consultant shall be required to manage the study and coordination with any subconsultants, as well as bear responsibility for all documentation and equipment needs. The consultant will identify a project lead from their team to act as the direct point of contact for the PBPN project manager.

This task will also include regular progress meetings with the PBPN project manager, the preparation of monthly progress reports, documentation of travel and expense receipts, and the preparation and submission of invoices. When submitting progress reports, the consultant will be required to outline the following:

- Performed work
- Upcoming tasks or milestones
- Status of scope and schedule
- Any issues to be aware of

Stakeholder and Public Engagement Program

The consultant will develop and implement a detailed stakeholder and public engagement program that seeks to gain authentic and meaningful public input from community members across the area. At a minimum, the stakeholder and public engagement program should address the following:

- Identification of and engagement activities for key communities that may be disproportionately impacted by traffic risks and traditionally underserved by safety efforts.
- Specific activities for reaching identified stakeholder group and engagement strategies that inform involve and empower stakeholders and the public
- Examination of perceived safety culture and concerns in the area
- Timeline for stakeholders and public engagement activities
- Communication methods for sharing information with residents and community members
- Strategy for effective and consistent messaging.

The consultant is encouraged to utilize creative methods, opportunities and activities when collaborating, engaging and informing stakeholders and the public.

Data Collection and Review

The consultant will collect and review existing, programs, policies, and activities, and provide a summary of current efforts to address transportation safety in the area. The consultant should also review strategies that other cities, counties, and MPOs are using to address safety, identify programs that have evidence of

measurable success, and provide an assessment of the most effective and efficient methods used to achieve outcomes.

As part of this task, the consultant should at minimum:

- Review existing local, regional, state, and federal plans, studies, and initiatives related to roadway safety improvements to identify opportunities to improve processes for prioritizing transportation safety and collaboration that could lead to improved effectiveness of safety analysis, project development, and implementation for jurisdictions
- Conduct a peer review and comparison of the crash analyses of similar sized areas. This review should include, but is not limited to, a comparison based on crashes per VMT and crashes per capita, and exposure to risk/crash risk;
- Assess the quality and completeness of existing available data including crash, transportation, land use, and demographic data; and
- Develop recommendations based on literature, policy, and data review on best analysis strategies and data requirements.

Safety Analysis

The consultant will conduct an analysis of existing safety conditions and historical trends that provides a baseline level of crashes involving fatalities and serious injuries across jurisdictions in the area. This safety analysis shall include an examination of locations where there are crashes and the severity of the crashes, as well as contributing factors and crash types by relevant road users (personal motorists, bicyclists, pedestrians, freight, etc.). An analysis of systemic and specific safety needs should also be performed, as needed (e.g., high-risk road features, specific safety needs of relevant road users, public health approaches, analysis of the built environment, demographic, and structural issues, etc.). To the extent practical, the analysis should include all roadways within the PBPB Reservation without regard to ownership.

Transportation Equity Review

The consultant will perform a transportation equity review to better understand how current transportation systems, services, and decision-making processes impact the lives of all users, including underserved and underrepresented communities in the area. This should include an analysis of systems, services, and processes that support safe and easy-to-use multimodal options, amenities that are accessible to all populations for reaching destinations independently, and strategies to reduce socioeconomic disparities experienced by underserved and underrepresented communities.

As part of this task, the consultant should develop and assess regional transportation indicators that easily measure transportation barriers on the PBPB Reservation and area and/or potential structural inequalities that different population groups may face. These indicators should include, at minimum:

- Accessibility
- Connectivity
- Effectiveness
- Environment
- Health
- Mobility

- Safety
- Level of community engagement
- Other equity indicators, as required.

Implementation Matrix

The consultant will develop an implementation matrix that identifies potential projects, strategies, and recommendations for future grant opportunities, measures that can be included in regular maintenance cycles, and potential updates to PBPN area jurisdictions to better align with safety best practices. The implementation matrix will recognize the needs of all users of the regional transportation system, potential projects that are feasible and applicable for grant funding, conceptual infrastructure improvements with estimated costs, and schedule for implementation. Strategies and recommendations shall consider and outline fiscal and staff time resources necessary for a continued, sustained, and successful effort to achieve traffic safety goals and meet SS4A objectives after plan adoption. A project readiness timeline for each strategy and project should be included for short-term (0-5 years), mid-term (5-10 years), and long-term (10+ years).

Administrative Draft and Final Plan

The consultant will prepare an administrative draft of the Comprehensive Safety Action Plan for review. This draft is to be provided as an electronic PDF to the PBP Nation. The consultant will develop a final report that is visually appealing, easy for policymakers and stakeholders to understand, and communicates action plan strategies and recommendations. The report should be able to be used both digitally and in hard copy format. This may take the form of separate print and web formats.

Specifically, the consultant should develop a final report that:

- Is organized and communicates a clear message both graphically and with accompanying text
- Is easy to read and understand
- Explains key implications as they relate to policies, programs, practices, strategies, infrastructure projects, funding, and other recommendations.

The consultant shall provide PBPN with appropriate presentation materials for final review and approval of the Comprehensive Safety Action Plan. If the consultant wishes to include assistance with the final approval process in their scope of work, this should be accounted for in the proposal.

Executive Summary/Fact Sheet

Upon completion of the Comprehensive Safety Action Plan the consultant shall develop a brief executive summary or fact sheet in PDF format which relays all pertinent information in an easy-to-follow format. The summary should be concise and highly graphic, highlighting major assumptions, strategies, and recommendations.

Deliverables

Upon final project completion, the consultant will be responsible for providing a high-resolution document in PDF format. The consultant is also expected to provide PBPN with all data and study products. All meeting summaries and technical analyses should be included as an appendix of the study.

NOTE: If the consultant wishes to modify or include additional tasks deemed necessary to complete the study, this must be agreed to by PBPN before issuing the notice to proceed.
